Office Action Summary	Application No.	Applicant(s)	
	09/740,679	CUMMING, J. STUART	
	Examiner	Art Unit	
	Paul B. Prebilic	3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 53-124 is/are pending in the application.
- 4a) Of the above claim(s) 58, 60, 62, 64-72, 75, 76, 78-89 and 91-98 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 53-57, 59, 61, 63, 73, 74, 77, 90, 99-102 and 104-124 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Election/Restrictions

Claims 58, 60, 62, 64-72, 75, 76, 78-89, and 91-98 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 11, 2002.

Specification

The disclosure is objected to because of the following informalities:

On page 1 of the specification, the continuity data is not updated with the current status of each parent application.

Appropriate correction is required.

Claim Objections

Claim 53 is objected to because of the following informalities: On lines 7-8 of claim 53, the language requiring "the optic being flexible for facilitating maximum movement of the optic relative to the outer ends of the haptics" does not appear to be drawn to the elected invention and does not appear to have clear antecedent basis from the specification. Particularly, the elected species (Figure 18) shows a flexible haptic that would permit movement but not an optic that would permit movement relative to the optic. Moreover, it is confusing to state that the optic facilitates movement with respect to itself and the outer ends. It appears that "the optic" (second occurrence of line 7) should be changed to "the at least two haptics" to make the language clearer.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 112, 114, 117, and 119 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-9 of U.S. Patent No. 6,051,024. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are read on by the patented claims except for the flexible optic. However, flexible optics would have been considered obvious if not inherent to that of the patent claims. For this reason, the Examiner asserts that the present claims are clearly obvious over patented claims.

Claims 112-114, 117, and 121 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 2 of copending Application No. 10/977,233. Although the conflicting claims are not

Art Unit: 3738

identical, they are not patentably distinct from each other because the copending claims are read on by the present claims such that they are considered to be clearly obvious in view thereof.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 112, 114, 117, 119, 122, and 124 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 32 and 57 of U.S. Patent No. 7,048,760 in view of Hoffer (US 4,244,060). The present claims are read on by the patented claims except for the presence of fingers as set forth in the patented claims. However, Hoffer and Tennant both teach that it was known to use finger shaped structures on plate haptics; see the figures of each. Therefore, it is the Examiner's position that it would have been obvious to put fingers on the haptics of the presently claimed device for the same reasons that the prior art does the same.

Claim 53 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 11/297,233. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claim is read on by the copending claim such that it is considered clearly obvious in view thereof.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 112-124 are rejected under 35 U.S.C. 102(b) as being anticipated by Schlegel (US 4,424,597). Schlegel anticipates the claim language where the lens and haptic structure is made entirely out of flexible silicone and it is inherently capable of accommodating due to flexing at the haptics to the extent required by the claim language; see Figures 3 and 4 as well as column 3, lines 17-30 and column 4, line 24 to column 5, line 17. The fact that stiffeners can be added to increase rigidity indicates that the haptics are inherently quite flexible without this optional feature. Furthermore, the holes are added to the haptics to make them even more flexible as desired; see column 4, lines 38-45.

With regard to claim 123, the groove as claimed is between the lens (11) and the ridge (23).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 104 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schlegel (US 4,424,597) in view of Tennant (US 4,254,510). Schlegel meets the claim language as explained *supra* but fails to disclose pairs of knobs for each haptic as claimed. However, Tennant ('510; see Figure 1 and elements 13a and 14a) teaches that pairs of knobs for each haptic were known. Therefore, it is the Examiner's position that it would have been obvious to form such features on the Schlegel device for stability of the implanted device and for the same reasons that Tennant ('510) utilizes the same.

Claims 53-57, 59, 61, 63, 73, 74, 77, 90, 99-102, and 105-111 are rejected under 35 U.S.C. 102(b) as anticipated by Schlegel (US 4,424,597) or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schlegel (US 4,424,597) in view of Tennant (US 4,254,509) or Tennant (US 4,254,510). Schlegel meets the claim language and apparently discloses an embodiment where the optic diameter and the haptic width are the same; see column 4, lines 28-31. The haptic flap width is best understood and comparing the lateral or horizontal width of the optic and haptic. In the situation where these dimensions are the same, the haptic flaps (21 and 22) would only partially surround the optic as now claimed.

Alternatively, one may not understand Schlegel in the manner the Examiner has interpreted it. However, Tennant ('509) and Tennant ('510) both teach that it was known to make plate haptics that only partially surround the optic; see the figures of each. For this reason, it would have been obvious to make the Schlegel invention the same way for the same reasons that Tennant ('509) or Tennant ('510) does the same or

Art Unit: 3738

in order to save on material costs of making the lenses by reducing the lateral width of Schlegel's haptics.

With regard to claims 99 and 102, this width issue has been addressed in the above rejection.

With regard to claim 100, the knob as claimed is the ridge (17) of Schlegel.

Response to Arguments

Applicant's arguments filed November 22, 2006 have been fully considered but they are not persuasive.

With regard to the traversal of Schlegel under Section 102 that Schlegel does not disclose accommodation, the Examiner asserts that the structure of Schlegel is inherently capable of flexing and accommodating as evidenced by the very statement therein of lines 38-45 of column 4. In other words, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim; see MPEP 2112 that is incorporated herein by reference. Furthermore, the Examiner asserts that the "great mechanical stability" of Schlegel refers to the device's ability to stay inside the lens capsule once implanted thereinto.

With regard to the traversal pertaining to claim 99, the explanation has been amended to refer to the corresponding reference number of Figures 3 and 4. That

Art Unit: 3738

along with the rejection explanation added due to the Applicant's amendments should make it clear how Schlegel reads on the claim language.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Paul B. Prebilic whose telephone number is (571) 272-4758. He can normally be reached on 6:30-5:00 M-Th.

Art Unit: 3738

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
